DETAILED ACTION

Claim Objections

Claim 1 is objected to for the grammatical errors, line 14. "And" should replace with "an".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,3,4,5, are rejected under 35 U.S.C. 102(b) as being anticipated by 6,347,425 (Fattori et al.).

Figure 4 of the Fattori et al. shows a brushing attachment for an electric toothbrush comprising an elongate neck with a head (16) at an end thereof, a tuft block (18) mounted within the head so as to move linearly along the longitudinal axis and pivotally about the central axis, and a drive shaft (14) extending through the neck and having an angularly offset arm (bent end (36)) being received within a recess (50) (see col.3, lines 13-50). The dogleg at the end of the drive shaft is show in figures 4 and 5. The opening of the recess (50) is considered to be equivalent to the claimed slot.

Claims 1,2,3,5, are rejected under 35 U.S.C. 102(b) as being anticipated by CN 1166130.

The CN patent illustrates a brushing attachment which comprises a neck (2) having a head (10) at one end thereof, a drive shaft (18) extending through the neck (2) and connected to a tuft block (12). The shaft (25) including an offset section (19) with a dogleg (7) therebetween. The block (12) includes a recess into which the driveshaft (18) extends. The block (12) includes a pin (23) which is fixed into the block. Figure 1 shows that the block rotates about the longitudinal axis and pivots about the central axis (26,27).
